EVAC UBP 30S

All in one machine

Benefits

- Efficient, clean and silent electromechanical drive
- Compaction in durable plastic sacks
- Compaction and baling in one single unit
- “Double-stroke” and “Stay-n-Hold” functionality
- 5 ton pressing power – up to 90% volume reduction
- No deterioration in efficiency after years of operation
- Easy to retrofit; “Plug-n-Press” installation
- Over 500 units supplied in recent years

Included:

- 5 pcs of extra thick plastic sacks
- 2 rolls of baling bands
- 1 tube of spindle grease
- 1 extractor hook for baling band

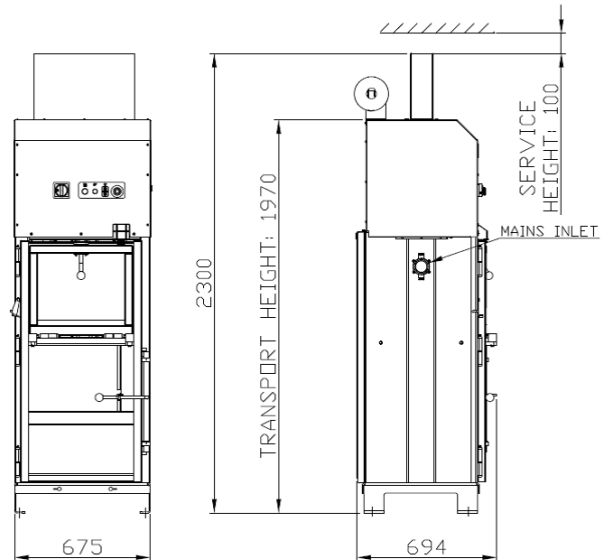

COMBINED SACK COMPACTOR AND BALING PRESS

The Evac UBP 30S combines a sack compactor for general waste with a baling press for cardboard and plastic film. The Evac UBP 30S compacts general waste into cubic plastic bags that are easy to transport. The baling bands can be used as handles, making it easy for crew to handle the bails.

The Evac UBP 30S is specially designed for marine applications. The unit is bolted to the deck, making it safe and comfortable to operate even in rough seas. The Evac UBP 30S is also electromechanical, meaning it is quiet and there is no hydraulic oil leakage or mechanical deterioration over time.

The compactor has unique double-stroke and stay-n-hold functions for an increased compaction rate of over 90%, and the press head has a proven press force of over five tons.

The Evac UBP 30S features plug-and-play installation with automatic phase order control. An indication is given when a chamber is full

Features

Dimensions			
Height	2 300 mm	IP Class	55
Width	675 mm	Press power	6 ton
Depth	694 mm	Material	Steel S3355JR, Painted
Service height	100 mm	Feed opening	520 x 380 mm
Net weight	315 kg	Bale (dim)	550 x 550 x 650 mm 30–70 kg
Voltage, Rating, Rated current	3 x 220-690 V, 50/60 Hz - 2.2/2.0 kW	Electrical syst.	IEC 60092 compliant
			DNV-GL Maritime Verification report
